

The students enrolled in the B.Sc. Engineering Honors Degree specializing in Computer Science and Engineering possess the proficiency and aptitude to adapt effectively to digital transformation. As part of their comprehensive academic program, these students are equipped with a broad understanding of computer systems, software development, data analytics, and other relevant fields. The **CSE Careers Day 2023** provides the opportunity for organizations to interact and evaluate the potential of recruiting and employing individuals of such high competence.

This booklet consists of the résumés of the CSE undergraduates of the '18 Batch who are expected to graduate soon. These résumés highlight their most unique competencies, experience, and knowledge amassed from diverse domains, both before and during their undergraduate period.

To facilitate convenience of use, these resumes adhere to a standardized format and are organized alphabetically by the first name of each undergraduate. Furthermore, for the purpose of reference by last name, an index is located at the end of the booklet, which lists them accordingly.

## INDEXES

Nuwan, Abeynayake (6)

Nagitha, Abeywickrema (8)

Lahiru, Akmeemana (10)

Isuru, Ariyaratne (12)

Rahal, Athukorala (14)
